PROJECT / PRODUCT MANAGER

Project & Product Manager with 5+ years of experience translating business objectives into roadmaps and driving cross-functional execution across platform, infrastructure, and operations. Proven at facilitating planning workshops, mentoring delivery leaders, and presenting KPIs to C-level executives to enable strategic decision-making. Strong technical foundation bridging product strategy and engineering execution. Fluent in English and Filipino.

Strategy Execution & Roadmap Framing
Process Improvement & Change Management
Platform, Marketplace & Systems Architecture

Cross-functional Leadership
Infrastructure, Security & Tooling Strategy
Agile Execution, Roadmaps & OKRs

EXPERIENCE**Senior Project Manager | Symbols**

Portland, U.S.A.

*No-code UI kit platform for both designers and editors***August 2025 – Present**

- Translated leadership priorities into multi-quarter delivery roadmaps, aligning product, engineering, and QA on strategic outcomes and execution plans.
- Facilitated **cross-functional planning, prioritization, and delivery governance workshops** to align stakeholders on scope, sequencing, and tradeoffs.
- Owned program execution across 10+ engineers, designers, and PMs; **improved delivery predictability by 30%** through WIP limits, unified tracking, and release milestones.
- Defined and presented executive KPIs (**delivery predictability, cycle time, release stability, defect trends, capacity utilization**) to C-level stakeholders to inform prioritization and investment tradeoffs.
- Mentored PMs and engineers on **best practices, risk management, and quality standards**; led continuous improvement workshops to remove bottlenecks and standardize workflows.

Project Manager and Software Manager | SERVPRO

Portland, U.S.A.

*Company focused on reconstruction in disaster response***August 2024 – May 2025**

- Led operational strategy execution by framing **system implementation roadmaps and facilitating cross-department planning workshops**.
- Drove change management and workflow redesign through process mapping, bottleneck analysis, and targeted automation; improved operational throughput by **50% in 3 weeks**.
- Managed end-to-end technology programs (vendor selection, procurement, configuration, data migration) for 100+ users across field and office operations.
- Built and presented executive dashboards and KPIs to leadership, improving visibility into risks, progress, and resourcing needs.

- Led technical execution for **enterprise e-commerce platforms**, including **Saks Fifth Avenue, Saks Off 5th, Vari, and Berkshire Hathaway**, aligning product strategy with engineering delivery.
- Facilitated release planning and cross-team coordination; ensured **high availability during peak traffic and promotions for platforms serving millions of users**.
- Led implementation of **Apple Pay and Buy Online, Pick Up In Store (BOPIS)** solutions across multiple enterprise storefronts.
- Ran performance audits using Salesforce Commerce Cloud tools and Google Lighthouse, improving page speed and reliability.
- Served as technical lead bridging product requirements and engineering execution, **mentoring developers and aligning delivery with business priorities**.

- Contributed within **Scrum sprints, backlog grooming, and sprint planning cycles**, supporting regulated healthcare platform releases.
- Assisted in **project coordination and delivery** for the **myBlueCross** portal serving statewide users.
- Improved sprint predictability by applying story point estimation and retrospective-driven process improvements.

EDUCATION

M.Eng, Computer Science
Oregon State University
Summa Cum Laude with a CGPA of 3.93

Corvallis, U.S.A.
September 2022 - June 2024

BS, Computer Science
Jacksonville State University
Magna Cum Laude with a CGPA of 3.8

Jacksonville, U.S.A.
August 2015 – December 2019

LEADERSHIP POSITIONING

Google Project Management Professional Certificate via Coursera
(Agile delivery, stakeholder management, risk planning, roadmapping, KPI-driven execution)

TECHNICAL TOOLKIT

Languages: Python, Java, C/C++, JavaScript, SQL, HTML, CSS, SCSS
